

# Telemedicine Readiness Checklist

The Telemedicine Readiness Checklist highlights key success criteria to consider when implementing a telemedicine service at your organization. The criteria are based on best practices and lessons learned from the implementation of existing telemedicine programs. Completing the checklist will help you determine if your organization is ready to implement a new telemedicine program. If you are not ready to implement telemedicine, the checklist will give you a clear picture of what specific areas require attention before proceeding.

**Organization Name:** \_\_\_\_\_ **Site Name:** \_\_\_\_\_

**Team / Persons Completing Assessment:** \_\_\_\_\_

**Signature of Clinical Telemedicine Program Lead:** \_\_\_\_\_

**Print Name:** \_\_\_\_\_ **Position:** \_\_\_\_\_

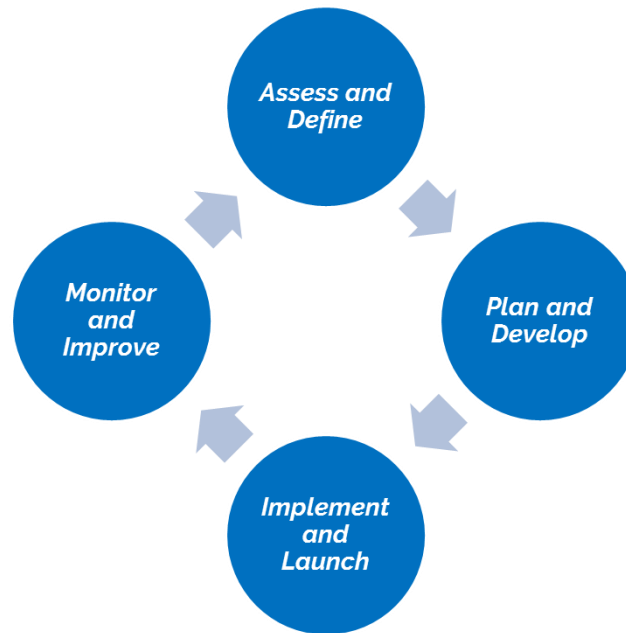

**Date:** \_\_\_\_\_

# Telemedicine Readiness Checklist

## *Approach Framework*

Our telemedicine readiness checklist identifies four easy steps to consider when planning and executing the development and launch of a telemedicine program within your healthcare organization.

## *OTN's Telemedicine Readiness Framework*

1. **Assess & Define:** Research and determine what priorities you trying to solve with telemedicine
2. **Plan & Develop:** Understand what's required for implementation and build a plan around it
3. **Implement & Launch:** Gather all resources, equipment and execute activities required to set-up telemedicine
4. **Monitor & Improve:** Measure the success of your implementation and identify areas for continuous improvement

# Telemedicine Readiness Checklist
